Scroll 1	Hero	Eyebrow	RESEARCH DIVISION	Keep		
Scroll 1	Hero	Headline	ESTOQI Labs	Keep		
Scroll 1	Hero	Sub-Tagline	MEASURED. VERIFIED. TRANSPARENT.	Keep — strong line		
Scroll 1	Hero	Body	Measurement is not just a method. It is a philosophy. Every result reflects a commitment to precision, purpose, and transparency.	Keep — this works		
Scroll 2	Testing Philosophy	Eyebrow	TESTING PHILOSOPHY	Keep		
Scroll 2	Testing Philosophy	Headline	We Measure Everything.	Keep — confident, sharp		
Scroll 2	Testing Philosophy	Body 1	We measure because we believe in accountability. Our testing protocols exist not to validate a position, but to pursue an honest answer — whatever that answer may be. We test every variable — pH stability, contact time, produce type, contamination load — before we make a single statement about efficacy.	Replace with: 'We test before we tell. Every claim — pesticide removal, shelf life, microbial reduction, nutrient retention — comes from NABL-accredited laboratory work. The numbers we publish are the numbers we measured.'		Your point #14 — simplify. The current paragraph is dense and self-conscious.
Scroll 2	Testing Philosophy	Body 2	We don't rely on manufacturer data or theoretical models. Every result published under the ESTOQI Labs banner is derived from independent, third-party validated testing conducted under controlled laboratory conditions.	REMOVE — defensive, undermines confidence		Your point #13.
Scroll 2	Tile 1	Headline + Subtext	Independent Testing / Third-party validated results	Keep		
Scroll 2	Tile 2	Headline + Subtext	Quantified Results / Precise numerical outcomes	Keep		
Scroll 2	Tile 3	Headline + Subtext	Reproducible / Consistent across batches	Keep		
Scroll 2	Tile 4	Headline + Subtext	Transparent Reports / Full methodology disclosed	Keep		
Scroll 3	How We Test	Eyebrow	METHODOLOGY	Keep		
Scroll 3	How We Test	Headline	How We Test	Keep		
Scroll 3	How We Test	Subhead	Our testing protocol is built on internationally recognized standards, adapted for the specific demands of ionized water efficacy measurement.	Keep		
Scroll 3	Step 01	Title	Sample Preparation	Keep		
Scroll 3	Step 01	Body	Fresh produce samples are sourced from commercial supply chains and tested within 24 hours of harvest. Baseline contamination levels are established using GC-MS and LC-MS/MS analysis.	Replace with: 'Samples are sourced from the same batch — never different batches — so test and control are truly comparable.'		Your point #15a — same-batch sampling is the credibility detail; current copy hides it.
Scroll 3	Step 02	Title	Treatment Protocol	Keep		
Scroll 3	Step 02	Body	Samples are immersed in ESTOQI-generated 11.5 pH ionized water for standardized durations. Temperature, pH stability, and ORP (Oxidation-Reduction Potential) are continuously monitored.	Replace with: 'Samples are fully submerged in ESTOQI-generated 11.5 pH ionized water for 5 minutes at room temperature.'		Your points #15b and #15c — specify the protocol; remove the continuous-monitoring claim.
Scroll 3	Step 03	Title	Post-Treatment Analysis	Keep		
Scroll 3	Step 03	Body	Treated samples undergo full residue panel screening. Results are compared against untreated controls and industry benchmarks. All data is reviewed by an independent laboratory.	Replace with: 'Treated samples undergo full residue panel screening. Results are compared against the untreated control (from the same batch). All testing is conducted by NABL-certified independent laboratories.'		Your point #15d — NABL labs ARE the independent verification; don't double-claim.
Scroll 4	Produce Test Reports	Eyebrow	TEST REPORTS	Keep		
Scroll 4	Produce Test Reports	Headline	Produce Test Reports	Keep		
Scroll 4	Produce Test Reports	Subhead	Expand each produce category to view detailed test parameters, methodology, and results summary.	Replace with: 'Each report compares treated samples against untreated controls from the same batch.'		Frames the Test vs Control method clearly.
Scroll 4	Tomato	Card Body	Comprehensive pesticide residue analysis and surface contaminant reduction study.	Keep	Lab Report: Tomato Test vs Control (PDF)	
Scroll 4	Okra	Card Body	Surface biofilm and pesticide residue reduction study on fresh okra.	Keep	Lab Report: Okra Test vs Control (PDF)	
Scroll 4	Spinach	Card Body	Leafy green decontamination efficacy study including E. coli and pesticide markers.	Keep	Lab Report: Spinach Test vs Control (PDF)	
Scroll 4 [NEW]	Rice [ADD]	Card Headline	—	Add new card: 'Rice'	Lab Report: Rice Test vs Control (PDF)	Asset exists per your inventory.
Scroll 4 [NEW]	Rice [ADD]	Card Body	—	Pesticide residue analysis on uncooked rice grains.		

Scroll 4 [NEW]	Dal [ADD]	Card Headline	—	Add new card: 'Dal'	Lab Report: Dal Test vs Control (PDF)	Asset exists per your inventory.
Scroll 4 [NEW]	Dal [ADD]	Card Body	—	Pesticide residue analysis on uncooked dal, comparing pre- and post-Estoqi wash.'		
Scroll 5 [NEW]	Microbial Reduction Study	Eyebrow	—	ADD: 'BEYOND JUST PESTICIDES'		Your point #3 — microbial study deserves its own visible section.
Scroll 5 [NEW]	Microbial Reduction Study	Headline	—	Microbial Load Reduction — Spinach Study'	Lab Report: Microbial Load on Spinach	
Scroll 5 [NEW]	Microbial Reduction Study	Body	—	Pesticide isn't the only invisible threat on fresh produce. Our spinach microbial load study shows how Estoqi water reduces microbial colonisation — a key driver of spoilage and a public health concern in leafy greens.'		
Scroll 6 [NEW]	Shelf Life Study	Eyebrow	—	ADD: 'SHELF LIFE'		Your point #4 — major proof point for the 2x shelf life claim.
Scroll 6 [NEW]	Shelf Life Study	Headline	—	2× Shelf Life — Tomato Batch Study'	Lab Report: Tomato Shelf Life (multiple variants)	
Scroll 6 [NEW]	Shelf Life Study	Body	—	We tested multiple tomato variants — same batch, same conditions — with and without Estoqi treatment. Estoqi-washed tomatoes stayed fresh for more than 2× as long. This is the negative ORP doing its job, slowing oxidation at the surface.'	Visual: side-by-side photographic timeline of tomato decay (Test vs Control, Day 1 / 4 / 8 / 12)	
Scroll 7 [NEW]	Nutrient Enrichment	Eyebrow	—	ADD: 'NUTRIENT ENRICHMENT'		Your point #5 — the brand-changer. Estoqi doesn't just REMOVE; it ENRICHES.
Scroll 7 [NEW]	Nutrient Enrichment	Headline	—	Beyond Removal — What Estoqi Leaves Behind'	Lab Report: Nutrient Enrichment — Capsicum & Tomato	This is a narrative pivot. Don't bury it.
Scroll 7 [NEW]	Nutrient Enrichment	Body	—	Most produce-washing methods strip nutrients along with contaminants. Estoqi water does the opposite. Our capsicum and tomato studies show measurable retention — and in some markers, enrichment — of key nutrients post-wash.'		
Scroll 8	ESTOQI vs Conventional Methods	Eyebrow	COMPARATIVE STUDIES	Keep		
Scroll 8	ESTOQI vs Conventional Methods	Headline	ESTOQI vs. Conventional Methods	ESTOQI vs. Ozone		
Scroll 8	ESTOQI vs Conventional Methods	Body	We benchmark ESTOQI's ionized water treatment against the most common produce cleaning methods — plain water rinse, vinegar soak, and commercial produce wash — across three key performance indicators.			
Scroll 8	Benchmark Data	All values	[28%, 22%, 15% / 61%, 55%, 38% / 74%, 68%, 52% / 94%, 89%, 91%]	Keep		Critical reconciliation.
Scroll 9	Standards We Adhere To	All	[FSSAI, AOAC, ISO 6888, APEDA, FDA BAM, BIS IS 10500]	Keep — strong block. Mark certifications as 'In Process' until they're live, per your point #6	Standard Certification logos (pending — placeholder until live)	Your point #6.
