

Scroll / Section	Section Label	Element	Current Content	Suggested Edit / Revised Content	AV / Assets Needed	Flow / Strategic Notes
Scroll 1	Hero	Eyebrow	THE SCIENCE	Keep		
Scroll 1	Hero	Headline	Grounded in Molecular Truth	Replace with: 'The Science Behind Estoqi.'		<i>Molecular Truth' is a phrase that means nothing. Plain language wins on a Science page.</i>
Scroll 1	Hero	Body Copy	Understanding is the first step toward better choices. Every claim we make is grounded in peer-reviewed research, independent laboratory verification, and a commitment to scientific clarity.	Replace with: 'Understanding is the first step toward better choices. Four ideas that explain everything Estoqi does.'		<i>Sets up the new 'Verify It Yourself' section.</i>
Scroll 2 [NEW]	What is pH and Why Tap Water Fails	Eyebrow	—	Replace existing Science Visualized cards with a SEQUENTIAL EXPLAINER. First explainer: pH.	<i>Demo snippet: 'What Is pH and Why Normal Water Fails'</i>	<i>Restructured per your point #11 — make the Science page logical and walk the consumer through.</i>
Scroll 2 [NEW]	What is pH and Why Tap Water Fails	Headline	—	01 — pH: Why tap water can't clean your food'		
Scroll 2 [NEW]	What is pH and Why Tap Water Fails	Body	—	Pesticides are oil-based and engineered to survive rain — rainwater sits at pH 7, exactly the same as your tap. That's why washing under the tap doesn't lift them. Estoqi's wash water sits at pH 11.5, where oil-based residues emulsify and lift away on contact.'		
Scroll 2 [NEW]	What is pH and Why Tap Water Fails	Verify Tile	—	Verify it yourself: a basic litmus paper test will show that tap water sits at pH 7. Estoqi wash water turns blue litmus deep blue — confirming pH 11+.'	<i>Image / GIF of litmus test result</i>	<i>Your point #11 — show consumers HOW to verify pH.</i>
Scroll 3 [NEW]	ORP and Antioxidants	Headline	—	02 — ORP: How water becomes an antioxidant'	<i>Demo snippet: 'ORP, Antioxidants and Shelf Life'</i>	
Scroll 3 [NEW]	ORP and Antioxidants	Body	—	Oxidation-Reduction Potential (ORP) measures whether a substance promotes or fights oxidation. Tap water sits at +200 to +400 mV — promoting oxidation. Estoqi drinking water sits at negative ORP — fighting it. This is what slows browning in cut fruit, slows oxidation in your cells, and extends produce shelf life when used to wash food.'		<i>[Reconcile ORP number — brand brief says -800 to -1200, current site says -200 to -400. PICK ONE.]</i>
Scroll 3 [NEW]	ORP and Antioxidants	Verify Tile	—	Verify it yourself: an ORP meter (₹2-3K, available online) will read a positive value for tap water and a negative value for Estoqi water. Try it.'	<i>Image of ORP meter showing readings</i>	
Scroll 4 [NEW]	Molecular Hydrogen	Headline	—	03 — H ₂ : The smallest antioxidant in existence'	<i>Demo snippet: 'Hydrogen-Rich Drinking Water'</i>	
Scroll 4 [NEW]	Molecular Hydrogen	Body	—	Molecular hydrogen (H ₂) is the smallest molecule that exists. Small enough to enter cells that Vitamin C and E cannot. Estoqi drinking water carries 1,200 ppb of dissolved H ₂ — research shows it selectively neutralises the most harmful free radicals in the body. (Published in PubMed Central — link below.)'		
Scroll 4 [NEW]	Molecular Hydrogen	Citation	—	Link out to PubMed paper		
Scroll 5 [NEW]	Micro-Clustering & TDS	Headline	—	04 — Micro-Clustering: Water that gets in deeper'		
Scroll 5 [NEW]	Micro-Clustering & TDS	Body	—	Conventional water molecules cluster in groups of 12-14. Estoqi's electrolysis process breaks them into clusters of 5-6 — small enough to pass through cellular aquaporin channels, and to penetrate deeper into produce surfaces when washing.'		
Scroll 5 [NEW]	Micro-Clustering & TDS	Verify Tile	—	Verify it yourself: a TDS meter (₹500, any e-commerce site) measures dissolved solids. The reading on Estoqi water will show consistent mineral retention — proving that electrolysis enhances water without stripping it.'	<i>Image of TDS meter</i>	<i>Your point #11.</i>
Scroll 6	Deep Science (Technical Reference)	Eyebrow	TECHNICAL REFERENCE	Keep		
Scroll 6	Deep Science	Headline	Deep Science	Keep		
Scroll 6	Deep Science	Accordion 1	Molecular Hydrogen (H ₂)	Keep		<i>Content currently missing in accordion — populate.</i>
Scroll 6	Deep Science	Accordion 2	Electrolysis & Electrode Technology	Keep		<i>Important brand detail. Surgical-grade specification is a credibility marker.</i>
Scroll 6	Deep Science	Accordion 3	Clinical Studies & Research	Keep		
Scroll 6	Deep Science	Accordion 4	ORP & Antioxidant Potential	Keep		
Scroll 6	Deep Science	Accordion 5	Produce Cleansing Mechanism	Keep		
REMOVE	Verified by Independent Labs	Whole Section	[Fold 4 on current site]	REMOVE — redundant with Labs page		<i>Your point #12.</i>
REMOVE	Science, Visualized (old layout)	Whole Section	[Two stacked video cards with same content]	REPLACE with the sequential explainer above. The two original videos can be embedded inline within the relevant explainer sections.
